

REIMYO: Impossible sound made possible!

"Reimyo" means miracle, and that's the name Harmonix has given to its growing lineup of cutting-edge sound equipment. The Reimyo lineup truly lives up to its name. The lineup was designed through High-TechFusion; that's where Harmonix collaborates with the world's finest specialized companies, combining the best technology in the world to create an unprecedented, and otherwise impossible, product line. As their name implies, these systems bring out natural sound in an almost miraculous way.

REIMYO SERIES:

CDP-777 CD Transport / Player

DAP-777 Digital Audio Processor

PAT-777 300B Single Stereo Power Amplifier

In such a short time the Reimyo products are spreading their miraculous natural sound around the world.

Sound & Sight Journal Singapore: The Best CD Player in 2002 Harmonix CDP-777

Although the Harmonix CDP-777 is cheaper than the "Digital Triangle" the price of \$19,800 exceeds my budget and I could not afford! However, for the serious audiophiles searching for perfect sounding CD Player, Reimyo CDP-777 is the only choice.

„Inside it works an extended version of the K2 processor by JVC. The upsampling rate is 24-bit / 176.4 kHz, the D/A converter works with 24-bits with a data rate of 705.6kHz, while digital filtering is done with 24-bit 4x (176.4 kHz x 4).

„Live recordings in particular turn into a powerful and intense experience.“

This may be due to the CDP-777's ability to unlock so much more spatial information from Cds than one is normally accustomed to experiencing.“

„The high resolution and tremendous information content are accompanied by a broadly expanded palette of audio hues.“

„Of course the choice of the word palette again implies too much of a raster, section or division into values.“. „World class.“
